

Overview of Costs and Charges when investing in securities

Better overview of costs and charges when investing in securities at Arion Bank

Overview of estimated costs and charges before investing

When investing in securities, it is important to know the costs and charges related to the transactions and the effect on returns.

The Markets in Financial Instruments Directive (known as MiFID II) introduced new obligations on investment firms to provide their clients or potential clients with adequate information on all costs and related charges.

This document contains information on aggregated *estimated* costs and charges when trading shares, bonds, and funds. The costs are based on examples of trades with fixed terms on e.g. ongoing costs, holding period and amounts invested. These examples do not represent an exhaustive list of possible trades.

In the examples, three cost components are specified. *Firstly*, service costs. This includes all costs and related charges that Arion Bank charges in connection with transactions involving financial instruments, such as transaction costs, processing fees, and custody fees.

Secondly, product costs, i.e. costs and related charges directly associated with the financial instruments themselves. In the case of funds, this includes management fees deducted from the fund's assets.

Thirdly, third-party payments. This refers to payments that Arion Bank receives from third parties, such as commissions and discounts from fund managers in connections with their distribution. When Arion Bank manages assets on behalf of clients, the bank allocates third-party payments to the client. In other cases, the bank may retain third-party payments, provided that the payment is intended to enhance the quality of service and does not create a conflict of interest with the client's interest.

The effect of costs on returns

Costs have a negative effect on returns. The investment must generate a higher return than the cost to realize a positive return. The cost is typically higher at the beginning and end of the investment as a result of entry and exit costs, but is lower in the intervening period.

Actual costs may differ

The costs in the following examples are based on the list of fees and charges. Please bear in mind that the costs are estimated and the costs incurred by the client may differ, due to e.g. discounts, different holding period or the amount invested.

Once a year clients receive a detailed overview of the costs and charges paid during the year.

To get an overview of cost items please refer to the Fees and Charges for Investment Services available online at arionbanki.is/english/about-us/more/rates/.

The client should not interpret the information given in the examples as advice to buy, sell or otherwise dispose of financial instruments or as a forecast of future returns.

The information on estimated costs and related charges does not take into account costs which may arise from general risks when investing in financial instruments. Investors are encouraged to read the overview of the main characteristics of financial instruments and risk factors at arionbanki.is/investorprotection.

If any questions arise, please contact us by phone on 444 7000, e-mail at arionbanki@arionbanki.is or via webchat at arionbanki.is/english.

Shares

Listed domestic shares - trading via Online Banking or Arion App

Terms

The following example provides information on aggregated costs and charges, expressed both as a cash amount and as a percentage, when investing in listed domestic shares via Online Banking or Arion App. Additionally, the cumulative effect of the costs on the return are provided.

The holding period is assumed to be 5 years and the shares are sold at the end of that time. The company pays out dividends annually. For the sake of simplicity, the growth rate is set at 0% during the holding period. The investor is assumed to be a person, i.e. not a legal entity, and this particular financial instrument the only holding in the respective custody account.

Financial instrument:	Listed domestic shares	Growth:	0.00%
Trading venue:	Online Banking / Arion App	Market:	Iceland
Holding period:	5 years	Currency:	Icelandic króna (ISK)

¹ A minimum custody fee is payable on all portfolios, regardless of portfolio value and product. However, no custody fee, including a minimum fee, is charged on the funds of Stefirn hf. Please refer to the Fees and Charges for Investment Services at arionbanki.is/english/about-us/more/rates/

² This refers to ongoing charge and management fees.

Notes

Custody fees

Custody fees are paid for the custody of securities at Arion Bank and are calculated on the portfolio value every day. Custody fees are charged and debited on asset management portfolios at the end of each month and a minimum fee is factored into calculations. Custody fees on custody accounts are collected twice a year, on 1 April and 1 October.

A minimum charge is calculated on all active portfolios, and in addition a percentage of the total value of securities subject to charges in custody and asset management, which is in excess of the minimum fee, is calculated. Custody fees for bonds issued abroad are calculated on the nominal value.

No custody fees, including a minimum fee, is charged on the funds of Stefmir hf.

Ongoing charge

Ongoing charge is the costs associated with the daily operation of funds and are based on expenses from the previous year. The information reflects an assessment of likely scenarios in the future operation of the funds. They may be subject to reassessment without notice. The amount may vary from year to year. Transaction costs related to the portfolio, except where the fund pays a fee for the purchase and sale of units in another fund, are excluded. Ongoing charge is deducted from the fund on an annual basis and therefore result in lower returns.

Brokerage fees

Brokerage fees are paid for the brokerage of securities, e.g. For buying and selling shares and bonds.

Transaction fees

Transaction fees are charged for transactions with financial instruments and for corporate actions such as dividends, mergers etc.

Capital gains tax

This is a tax rather than a cost levied on capital income, i.e. interest, dividends, capital gains and rental income. Capital gains tax on interest income and dividends is withheld at the source, while capital gains tax on shares and rental income is paid afterwards.

Parties responsible for custody, collecting payment or receiving deposits should withhold interest income in the amount equivalent to the applicable capital gains rate and pay it to the treasury.

Management fees

Management fee is used to cover the operating costs of the funds. The management fee is taken into account in the daily calculation of the fund's value and returns, and is therefore deducted, resulting in lower returns.

Performance fees

Performance fees are primarily found in professional investor funds. If a fund has a performance fee, it is usually calculated when the fund achieves a predefined return over a certain period. This fee is deducted from the fund and therefore results in a lower returns.
